Paro 0140

Sliding panel with movable aluminium blades

Loggialu® Paro 0140 Privacy

Description

Loggialu® Paro 0140 Privacy combines the functionality of an efficient sun protection panel with the elegant appearance and aesthetic design of a high-quality modern concept.

The blades are movable with the "Privacy" concept, so they can be manually tilted from the closed to completely open position or vice versa.

The securely surrounding frame of extruded aluminium ensures good shape retention of the whole without visible connections in the corners.

Product

- Blades suitable for manual tilting from closed to open position or vice versa and divided into two operating areas, which allows, for example, the blades to be in the open position above and closed below
- Aesthetically finished panels without visible connecting elements
- Frame and blades in extruded aluminium with anodised or powder coated finish
- Delivered assembled and ready to install, custom manufacture
- Low maintenance:
 - High quality and maintenance-free slide fittings
 - Powder or anodised aluminium finish, easy to clean
- Suitable as sliding or fixed panel
- Sliding systems:
 - Easy sliding
 - Symmetrical sliding
 - Telescopic sliding
- Sliding panel can be manual or motorised
- Possible sizes are dependent on the local wind load and regional legislation ^(*)

^(*) In consultation with our project team

Technical specifications

- Aluminium components
 - Aluminium extrusion, alloy EN AW-6063 T66
 - Anodised (20 micron) F1
 - Polyester powder coating (60-80 micron) in RAL colours
- Blades:
 - Blade pitch : 57 mm
 - Size of the blade: 65 x 16 mm
- Frame with a depth of 40 mm, suitable for common panel sizes and wind loads
- Depending on the height of the sliding panel, the horizontal frame profile above can be 55 mm instead of 40 mm and below it can be 55 or 70 mm instead of 40 mm high

Options

- Flexible lower guiding system Flexguide® (see website for more information)
