Topfix[®] Max

Horizontal sunprotection with Fixscreen[®] technology for large surfaces

Topfix® Max

RENSON® Sunprotection-Screens introduces to you the Topfix® Max: the first horizontal sunprotection using the Fixscreen® technology that can cover extremely large surfaces. Its combination with the integrated tension system results in an exceptional fabric tension. Flapping and ruptured fabrics are a thing of the past.

This horizontal sunprotection prevents overheating in rooms with large light panels, skylights plus in conservatories. Complete blackout is possible by means of blackout fabrics whether used inside or outside – even up to 30 m².

Product

- Sunprotection with excellent fabric tension
- Windtight in any position
- Surfaces up to 30 m² can be covered
- Motor control
- Possible use of fabrics: Soltis®, Soltis® blackout and Rensonscreen®, Rensonscreen® Opaque
- Profiles available anodised or powdercoated in any RAL colour

Applications

- For all kinds of horizontal, vertical or inclined glazing: such as roof windows, light panels, conservatories, etc.
- For all window types: aluminium, wood, PVC
- For new buildings as well as renovation projects
- For private homes and public buildings: hospitals, care homes, offices, schools, etc.
- Top-bottom or bottom-top fitting
- Suitable for inside and outside use

Technical features

- Maximum dimensions: W 5000 x H 6000 mm
- Aluminium box: W 260 x H 202 mm
- Inclination from 0° to 90°.
 - For Horizontal installation:
 - Soltis® fabric: a minimum slope of 8° is required (except for Soltis® 86)
 - Soltis® blackout fabric: a min slope of 9° is required (in function of the dimensions)
 - Rensonscreen®: a min slope of 9° is required (in function of the dimensions)
 - Rensonscreen® opaque: a min slope of 9° is required (in function of the dimensions)
- Topfix Max F
 - Can be integrated into open wooden, aluminium on steel structures with or without assembly feet.
