Creating healthy spaces

Vegascreen®

Excellent sun protecting technique
to serve your comfort

Vegascreen®

Description

Vegascreen® helps to achieve a healthy indoor in your conservatory. This veranda sun protecting screen blocks the sunbeams before they reach the glass. RENSON® Healthy Veranda Concept®, a combination of an outdoor sun protecting screen and ventilation, creates a comfortable living environment in your conservatory, regardless of its orientation. With its elegant slim box, Vegascreen® perfectly suits the latest glass construction techniques and is an ideal match with all architectural styles.

Product

- New design provided with a renowned tension system
- Because the sides of the end cap & side channel are in the same place, a perfect fit is ensured
- Simple and quick assembly using stable installation sockets (available in various heights)
- Minimal box height is ideal in difficult assembly conditions, e.g. ideal for assembly under window sills or eaves
- Can be combined with Soltis®, Rensonscreen® or acrylic fabrics with a high sun protection coefficient
- Profiles available in all RAL colours

Applications

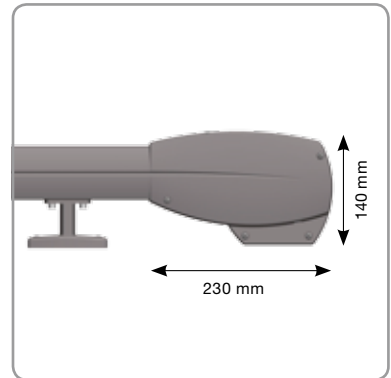

- Applicable with all inclined glazing panels such as verandas, greenhouses and winter gardens
- Suitable for new construction and renovation
- Vegascreen® is also suitable for construction projects, which are very demanding for sunprotection. For best results we recommend consultation with the construction designer, the project developer and the sun protection supplier at an early stage.

Technical features

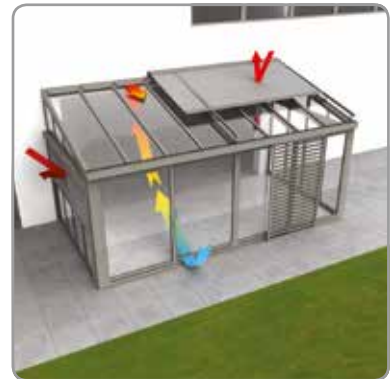

- Max. dimensions:
Single: W 4500 x P 6000 mm
Maximum surface: 27 m²
- Joinable: maximum width: 8000 mm
- Aluminium housing: W 230 x H 140 mm
- Additional support rolls will be provided to ensure an ideal screen tension:
From P 3000 mm: one additional support roll
From P 5000 mm: two additional support rolls
- In case of horizontal installation a minimal inclination is needed of 8° (not necessary for Soltis® 86)
- 5 year garantie
