Lineo[®] Luce

Translucent blade

Lineo® Luce

Introduction

For horizontal terrace coverings Camargue® and Algarve®, both equipped with rotating aluminium blades, Renson® introduces the integration of translucent blades, namely Lineo® Luce.

By partly providing your terrace covering with translucent blades, you create more openness.

In case the terrace covering is an extension of your residence, you bring more light into your home.

Product

- It is a translucent blade, consisting of a flat glass in combination with an aluminium supporting structure, which is integrated in the roof structure of the Camargue® and Algarve®
- As with standard aluminium blades, Lineo® Luce can be rotated to control shading and ventilation
- The Lineo® Luce ensures a waterproof roof system with perfect drainage during normal rain shower
- A nice sun protection is obtained when using laminated glass with a matt finish, which provides extra protection against sunlight
- Besides the nice sun protection, the matt, translucent blade creates an increased sense of privacy
- A group of multiple, translucent blades can perfectly serve as an entrance covering which this more highlights
- Due to its neutral appearance, it subtly absorbs the atmosphere and colour of its surroundings and reflects it on the terrace covering
- Very uniform light distribution and illumination without intense, direct sunlight
- Due to its design, the Lineo® Luce can perfectly be combined with our standard aluminium blades
- Easy to install, even afterwards!
- Maintenance friendly
- Durable

Applications

- Camargue®
- Algarve® and Algarve® Roof
- In case of an extension to a residence Lineo® Luce's translucent blades bring extra natural light into your home
- Visualisation of entrance

Technical features

- The glass plate is made of laminated, safety glass which meets the applicable standard
- The laminated glass film has a white matt finish
- Maximum length: 4,000 mm
- Thickness of glass: 8 mm
- Same dimensions as standard, rotating blades so that they can perfectly be integrated
- Maximum number: 5 translucent blades per terrace covering (both for Algarve® and Camargue®)
